ONSE TO SCHEDULE REVISION FOR OPERABLE UNIT 15 PER MEETING ON JARY 24, 1995 (01570) - RJR-608-95

Obtain regulatory agency agreement to milestone schedule submitted February 9, 1995

rpose of this correspondence is to restate the recommendation given to the ment of Energy/Rocky Flats Field Office regarding the acceleration of the Operable milestone schedule submitted February 9, 1995. As discussed in the meeting on ry 24, 1995, EG&G Rocky Flats, Inc. (EG&G) does not recommend further ration of the Operable Unit 15 milestone schedule. The schedule, as described, was ed to ensure a timely review and response from the regulatory agencies for all ing tasks relative to Operable Unit 15.

recommends that the milestone schedule referenced above be submitted and agreed the regulatory agencies as the enforceable milestones for the closure of Operable . The only change would be "Submit RCRA Certification" which should be amended 28, 1995 due to the need for procurement of an independent engineer to perform the ated task. The submitted milestone schedule is already accelerated and further ning is not advised. The justification behind **not** recommending any further schedule ration is that EG&G has consistently met or delivered early all milestones with regard to ble Unit 15. EG&G will continue the performance approach to work toward early tion of tasks. The recurring problems are the slow review and response times from ulatory agencies.

commended that the Department of Energy/Rocky Flats Field Office pursue an nent with the regulatory agencies to commit to timely reviews of all remaining ents. These agreed-on commitments should be tracked separately from the milestone ile. By using this approach, the success of Operable Unit 15 closure is not dized. EG&G will continue to accelerate deliverables as possible. As evidence, note that we will be submitting the Proposed Plan fifteen days ahead of schedule.

have any questions regarding this correspondence, please contact Rich Ray at one extension 8557 or Dennis Schubbe at telephone extension 8709.
